## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1, drawn to analyzing the noise content of a color digital image , classified in class 382, subclass 164.
  - II. Claim 2, drawn to reducing the amount of noise present in the image , classified in class 382, subclass 275.
  - III. Claim 3, drawn to user specification of noise characteristics to be added to a source image, classified in class 382, subclass 276.
  - IV. Claim 4, drawn to matching the noise characteristics of a source image with a reference image, classified in class 382, subclass 254.
  - V. Claim 5, drawn to combining noise with a source image in order to mimic the appearance of film grain, classified in class 382, subclass 260.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the generation of a model for image noise. Invention II has separate utility such as the reduction of image noise. Invention III has separate utility such as operator adjustment of noise to be added to a source image. Invention IV has separate utility such as matching the noise level of a source image to a reference image. Invention V has separate utility such as mimicking the appearance of film grain in a source image. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2621

4. A telephone call was made to Kathryn Kellough on April 22, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
